Abstract of JP8060530

PURPOSE: To automatically cut a fabric having a repeating figure pattern according to the figure pattern with a machine.

CONSTITUTION: This fabric is obtained by providing mechanically recognizable marks 3 at recurring reference positions in the fabric 1 of a continuous length having figure patterns 2 recurring at a prescribed interval. Warp yarns and/or weft yarns dyed with a fluorescent dye are suitable as the marks 3 and can mechanically be recognized by exposure to ultraviolet rays.
